

# CompEx Refresher Ex01R-04R

## Course Overview

Students will revise updated requirement for the installation of electrical apparatus for use in hazardous areas. The first day concentrates on current directives and practices. The second day delegates are assessed in maintenance, installation and inspection.

## Intended Audience

A working knowledge and experience of electrical installation and inspection is recommended. Students must have a valid CompEx Ex01-04 certificate.

## Duration

2 days

## Topics

- Sources of ignition
- Nature of hazards, identification of hazards
- Area classifications Zone 0, 1 and 2
- Selection of apparatus, cabling, glanding and termination
- Inspection and testing
- Management and remedial work

## Methods

Students will learn through lectures, demonstrations, hands-on learning, practical exercises and discussions. They will be evaluated via attendance, self-assessment, continuous assessment, a theory exam, and a practical test.

## Certification

- JTLimited Certificate of Core Competence valid for 5 years
